

Scotte Bio-comfort System Prices:

System consists of: Scotte bio-comfort burner, New 94% efficient boiler, 1.8m Auger, Controller & 200kg bag filled hopper (as shown in photograph)

2 to 16kw System with 94% efficient boiler (incl. delivery)	£4035.00 + 5% vat
2 to 24kw System with 94% efficient boiler (incl. delivery)	£4137.00 + 5% vat
4 to 30kw System with 94% efficient boiler (incl. delivery)	£4517.00 + 5% vat

Systems with more heat output are also available

Additions to consider:

Compressor cleaning of burner head – The burner will shut down after a certain amount of fuel has been burned and a high pressure jet of air will automatically remove any remaining ash or residue from the burner head. Additional Cost £322.00

Systems over 16kw of heat output require more fuel. It is worthwhile considering a bulk fuel store (minimum 3 tonnes capacity) instead of a bag filled hopper. Various options are available. Please contact us for further details.

Installation costs – Greenflame provide a full installation service to meet the criteria of the MCS and granting standards. Installation costs vary depending on the flue requirements, system design and bulk fuel store. Please contact us for further details.

A system commissioning charge of £250 to £350 per system is required depending on distance. This also confirms the installation for MCS granting standards and registration.

VAT is charged at 5% for domestic purchases.

The Scotte Bio-comfort system, installation and associated costs are all eligible for the Energy Saving Trust granting scheme. This scheme entitles homeowners within Scotland to a 30% rebate. Variations of this scheme are also applicable to England & Wales. Greenflame Technology is accredited with MCS registration.
